

# **Straight From Hell**

**Angel Witch**

I have strings to in the night, i was fighting for my life,  
seen survivor now, infected cry is for me;  
all lonely in the dark, my hand goes, my beat to heart,  
what once a realize, what's my doorway?

I see the people all about, i think go to hell to pay  
Oh i can't this be, but i starting here  
When i start to scream, i shout  
The day will see a here you out  
They'll don't know i've been a here, a tall

When i find, don't make it  
And a take in my turn to break it

I hear ways that's for the heights  
Feel a better than a rise  
Familiar faces want a time away...

They time to tell me, to go bye  
They time to tell me, the entire job  
That for stay to long, i cannot be says...

When i find, don't make it  
It's take in my turn to break it

Straight from hell, no one escape from this evil (2x)

When i find, don't make it  
And a take in my turn to break it

I see the people all about, i think go to hell to pay  
Oh i can't this be, but i starting here  
When i start to scream, i shout  
The day will see a here you out  
They'll don't know i've been a here, an all

Straight from hell, no one escape from this evil (4x)

(what maybe straight in the night?)
