

## Rocket Love

Angel

Listening to Star Trak's star tracks  
On the track to stars and back  
Only after we get to the end

Passing planets feeling small  
On the mattress floating off  
How you breathing up here with nothing on, nothing on, baby girl

But you look good in your spacesuit  
I can't keep my hands off you  
Plus it's easy to love you  
Oh up here, up here

I'mma take it slow, slow  
While the rockets burn, they burning  
We'll be making love, baby  
Rocket love, rocket love ooh

The candle's burning in the sun  
We don't need them but you like them  
They glow they glow, oh yeah  
We were at the bar for quite a while  
Took some time but we collided  
Big bang, Big bang, look at what we made beautiful.

But you look good in your spacesuit  
I can't keep my hands off you  
Plus it's easy to love you  
Ohh up here, up here

I'mma take it slow, slow  
While the rockets burn, they burning  
We'll be making love, baby  
Rocket love, rocket love ooh!

We can make believe that we're up therAnnotatee  
But we're only in the backseat of this eclipse oohh  
If the lights go by, that means the cops flew by  
But they won't bother us, no no no no!

I'mma take it slow, slow  
While the rockets burn, they burning  
We'll be making love, baby  
Rocket love, rocket love ooh!  
I'mma take it slow, slow  
While the rockets burn, they burning  
We'll be making love, baby  
Rocket love, rocket love ooh!
