

# Never Say Die

Angelic Upstarts

There's gotta be a future somewhere  
There's gotta be a chance out there  
Look through your own eyes never stop  
Close your ears to those on top

This country is for you and me  
Even if it takes anarchy  
The tune of glory's what we play,  
We'll try and help you through your day

And we will never say die in our city  
We'll never say die in our streets  
We'll never say die in our city  
Lit your fire and never cease

Put all the class behind you  
Cause you never gotta stop  
Make a noise for your future  
Make a noise that will never stop

And we will never say die in our city  
We'll never say die in our streets  
We'll never say die in our city  
Lit your fire and never cease
