

## Effervescent Island

Angelo De Augustine

Up with the morning light  
Covered in calico  
Aw You've been so tired leading my whole life  
Everyone was talking with  
Something supernatural  
The ephemeral light's messing up your mind  
The ephemeral light's taken up your time

You've been away for years  
Now you're in view again  
All we really care for is  
To see things shine  
But in the future it's  
Harder to feel divine  
Effervescent islands floating in the night  
Genuine representation of our life

Hate has faded  
Love is on the rise  
Slow like everyone's talking  
Left you hypnotized  
Entranced and stupefied

Down with the evening moon  
Pacing the avenue  
All of you is searching to feel so fine  
You were afraid but now you don't seem to mind  
Anything to touch the silence one more time  
Anything to feel the love we all shall find

Hate has faded  
Love is on the rise  
Slow like everyone's talking  
Left you paralyzed  
Inside infinite minds
