

Into the Night

Angels & Airwaves

I wanna know
At night I'll walk the streets to lead where any other dream can rarely go, you know
I'm paralyzed
Holding up a crying child I rarely ever fall asleep with time, a lie.

Breath it in, just follow me right to the end
When the sky goes you are the first to fall in
If you follow I'll give you the end of a rope
When the night goes carry you to the unknown,
Into the night we will go.

I don't wanna feel
That same old shitty wasted day I always ever feel when I am ill
These sterile eyes
Seen every little crack and watch those pieces fall from high up in the sky.

Breath it in, just follow me right to the end
When the sky goes you are the first to fall in
If you follow I'll give you the end of a rope
When the night goes carry you to the unknown,
Into the night we will go.
[x2]

Breath it in, just follow me right to the end
When the sky goes you are the first to fall in
If you follow I'll give you the end of a rope
When the night goes carry you to the unknown,
Into the night we will go.
