

# Wanderers Forever

Angelus Apatrida

We don't expect you understand this life  
But that's the fuel that moves our engines  
This opportunity comes once in a lifetime  
Never regretting of what we've left behind

Our passion is our backbone  
What makes us stand in line  
Hearts beating, spirits bleeding  
We are made of flesh and bones

One direction, one straight path  
That's how we live our lives  
Waking up the fury we hold inside

Thousands of miles we walked  
Rising after the falls  
We are free, we're wild, we are in this together  
We want it, and we need it  
Flying high and running slow  
We are wanderers forever

Living in the road so far away from home  
Growing up one family all across the world  
Raze everything to the ground in our way  
Feeling as stronger as it was the first day

Our passion is our backbone  
Our passion is our backbone  
What makes us stand in line  
Hearts beating, spirits bleeding  
We are made of flesh and bones

One direction, one straight path  
That's how we live our lives  
Waking up the fury we hold inside

Thousands of miles we walked  
Rising after the falls  
We are free, we're wild, we are in this together  
We want it, and we need it  
Flying high and running slow  
We are wanderers forever

Thousands of miles we walked  
Rising after the falls  
We are free, we're wild, we are in this together  
We want it, and we need it  
Flying high and running slow  
We are wanderers forever
