

Soldier

Angerfist

We hear the guns through the wind

We see the enemy approaching

We hear the guns through the wind

While we stand together no invader shall pass

We see the enemy approaching

We hear the guns through the wind

Now we will meet them face to face

While we stand together no invader shall pass

Let them come with their armies of shadows

They will not pass

And when this day of battle has ended we meet again in victory

Welcome to the army of Angerfist

The army of Angerfist

While we stand together no invader shall pass

Let them come with their armies of shadows

They will not pass
