

# Change

Angus & Julia Stone

Hey  
My farewell's tonight  
There you leave on a flying ship  
Upon the port, I would just sit and wait

Hey  
This felt as a rusty knife  
In my hand your heart sits  
The more I squeeze  
The more it just slips away

Change change change is over us now  
Change change change is over us now

Like one big cloud  
Like one big cloud  
Like one big cloud  
Like one big cloud  
I guess I'll see you around

Hey  
I've fallen in the blue  
In that deep blue dark of night  
I dream the dream, where we just might be

Change change change is over us now  
Change change change is over us now

Like one big cloud  
Like one big cloud  
Like one big cloud  
Like one big cloud  
I guess I'll see you around
