If someone hates you let them hate then
Bet you they don't even make sense
Or pay rent at their parents
Patience can make greatness
Just don't trip because no one is worth
Working your nerves over nerds tryna hurt
You with they words let em search for they dirt
Use it to urge you to work for the first
Place so wake up
Karma's a bitch when they face their maker
Startin' some shit that doesn't make them paper
They'll just fall on the list of the gang of haters
Till the day someone walks up to bust their dental
They'll be hating on all that got some potential
Say that they ball when they bum a rental
Hate in their heart is the one essential
That makes them do wrong cause it fogs their mental
Changing you all to be argumental
We raising the bar when we touch a pencil
So, live it up and proud
Take it from me, stay above the doubts
If anyone speaks on you, flood it out
Or pose with your middle fingers up and shout

Do you while we does us... does us... Do you while we does us... Hater do yo
u, hater do you

Never quit what you wanna pursue
Just insist to accomplish your dues
Why you pissed if they mock or want you to lose?
They don't get what you've gone through or walked in your shoes
Tell em get security
Cause someone revengeful could get you dirty
They grown but mentally skipped maturity
Jealousies stem from their insecurities
They should fall back cause there's people who will turn their pulse flat
I'm in all black for the beats that I've killed when I'm on tracks
See you acting like you lacking a ball sack
You ain't bad but that ain't half how a boss acts
Independent we stackin' up tall stacks
Got a passion for passing up contracts
Here's a tip, listen if you can't take a diss, make yo skin thicken

Don't just dismiss it, cause they mad that you have what they've been missin
,

Make that quick switch like an ignition
Never get pissed cause they've been fiction
Just some bitches who've been bitchin'
Just some bitches who've been bitchin'

Do you while we does us... does us... Do you while we does us... Hater do yo

Old advice, focus right
Cause this life is like a roll of dice
But way more than a poker night
Make sure you control it right
We were born to fight
Now aboard the flight
If the balls in your court be LeBron or Mike
If you're on the mic then record something hype that they'll all recite
If they cheap shottin' it, never feel weak homie, be confident
Tell them keep talkin' cause haters be nothing but free marketin'
They just be frontin' though take it from I
Never let nobody shake up your pride
You don't need nothing but faith on your side
Trusting your game is the way to survive
Let a chump cuss cause he's just mad that he suck, tell em tough luck
Get him pumped till he's angry as fuck that his blood pumps
Your whole mood shouldn't give a fuck what
People say just to strut tough
So for you fools tryna judge us, just do you while we does us

Do you while we does us... does us... Do you while we does us... Hater do yo
u, hater do you
Do you while we does us... does us... Do you while we does us... Hater do yo
