

Almost Right

Anime

Seen almost all the fragments of the whole
In every eye, every word,
In everything around me
And I know I almost ride the line
The one that can make me see
One that can make you feel me

We came out here breaking to pieces
And little flashes of light - too short to lead the way

It's so close today
Not a leaf but a tree
You take my hand still it's not me
And when it's the same for below and above
still I can't accept I know the way

It's so close today
Not a leaf but a tree
You take my hand still it's not me
And when it's the same for below and above
Same for the whisper and scream
And for here and away
I know I'm
Almost
right
