

No Moon At All

Anita O'Day

No moon at all what a night
Even livened bugs empty their light
Stars have disappeared form sight
And htere's no moon at all

Do't make a sound, it's so dark
Even Fido he's afraid to bark
Oh, what a perfect chance to park
And there's no moon at all

Shoul we want atmsphere
For inspiration be one kiss
Will make it clear that tonight is right
Ad right form life nights interfere
