

Get to Know Me

Anitta

You wanna skip the conversation
Saying you get impatient
Boy, you must have me mistaken
'Cause you gotta make it worth my time

I can judge on first impressions
You been wanting my attention
So if you got the right intention
Maybe I might like to change my mind

Got your foot down on the pedal
Now you're plotting how to make a move
Trying anything to get me next to you

I know you wanna get to know me
But I ain't sure if you can handle it
Can you read it on my body?
I know you wanna taste it on my lips

Show me what you could do for me
Tell me all about the benefits
I know you wanna get to know me
But I ain't sure if you can handle it

I know you want the lights down low and my clothes off
Pretty little thing on your arm you can show off
It's gonna take more than a dream, guess you know that
Guess you know that

You're gonna have to put in more than a minute
Treat me like a queen, show me now that you're in it
If you only stick around through the night, then forget it
Then forget it, yeah

Got your foot down on the pedal
Now you're plotting how to make a move
Trying anything to get me next to you

I know you wanna get to know me
But I ain't sure if you can handle it
Can you read it on my body?
I know you wanna taste it on my lips

Show me what you could do for me
Tell me all about the benefits
I know you wanna get to know me
But I ain't sure if you can handle it

I know you want to know me, put your body on my body
Trying anything to get me next to you
I know you want to know me, put your body on my body
Trying anything to get me next to you

I know you want to know me, put your body on my body
