

Should've Cheated

Ann Marie

(DJ Swift on the track)
(Mook got the keys jumpin')

I bet you're 'bout it, I ain't have a clue
What's goin' on?
Funny thing is that I still defended you
Even though you're wrong
Accusin' me of shit
'Cause you know that you were guilty
You know that I've been through some things
And baby, you're supposed to heal me
And you want me to forgive all your mistakes
But if was me, boy, would you do the same?

It take a day to lose trust and some years to gain it back
And you claimin' this shit love, well, fuck it up, bae
So you fucked up what we had, for some temporary ass
If I do that, I'm a hoe, I'm this, I'm that

Well, baby, I should've cheated, I should've cheated
And I shouldn't have been there for you when you need me
I should've lie, made you cry
Then told you that I love you, that should make it alright
I gave him a tour, give him what's yours
Baby, I will do to you what you done did to me before
Make you hurt but you did it first
And after all that I expect for you to try to make it work

If I was do all the thing, baby, that you done to me
Would you stay or would you leave?
If he, hit my phone, like, "Baby, what's up?"
"Is your nigga gone? 'Cause I wanna pull up"
Invite/Got him to the crib then I let him fuck
Would you like that?
But baby, I should've cheated
I shouldn't be there for you when you need me
Make you feel like you in it alone
What if I buss it open, say it's his while strokin'
Press decline when you callin' my phone?
Maybe then you'll find out

It take a day to lose trust and some years to gain it back
And you claimin' this shit love, well, fuck it up, bae
So you fucked up what we had, for some temporary ass
If I do that, I'm a hoe, I'm this, I'm that

Well, baby, I should've cheated, I should've cheated
And I shouldn't have been there for you when you need me
I should've lie, made you cry
Then told you that I love you, that should make it alright
I gave him a tour, give him what's yours
Baby, I will do to you what you done did to me before
Make you hurt but you did it first
And after all that I expect for you to try to make it work
