

Werewolves

Anna Abreu

I don't know your name
I don't care what you think
Streets are quiet now and waken now

Hungry for some flesh and ready for the blood
And every time the taste in your mouth I digest
Can't wait to own you
Love is gonna be the same
Change up, I am so nuts
I feel a little insane

You better hunt us down tonight
Cause the food is up and we're having a good time
You better start your guns and lives
Cause we howl like werewolves in the night

You better hunt us down tonight
Cause the food is up and we're having a good time
You better start your guns and lives
Cause we howl like werewolves in the night

Under the stars and the clouds are up
Dawn is hours away
There's no reason to stop lookin'

Can't wait to own you
Love is gonna be the same
Change up, I am so nuts
I feel a little insane

You better hunt us down tonight
Cause the food is up and we're having a good time
You better start your guns and lives
Cause we howl like werewolves in the night

You better hunt us down tonight
Cause the food is up and we're having a good time
You better start your guns and lives
Cause we howl like werewolves in the night

Can't fight the feeling now
I'm caught and I know how it feels
This night is your way out
No way, no friends, no lovers

You better hunt us down tonight
Cause the food is up and we're having a good time
You better start your guns and lives
Cause we howl like werewolves in the night

Like werewolves in the night
Like werewolves in the night
Like werewolves in the night

You better hunt us down tonight
Cause the food is up and we're having a good time
You better stop your guns and lives

Cause we howl like werewolves in the night
