

# Night Follows

Anna Graceman

Spin, all of these memories causin' my head to  
Spin, when I close my eyes, I'm back in that moment  
Again, it comes out of nowhere and, no, there's no tellin' when  
My fears come around to see if I'm still scared of them

I know the night follows  
Me wherever I go  
I can feel the shadows  
Follow me close, wherever, I go  
I know the night follows  
Me wherever I go  
Look to the stars and hope  
They're watchin' me close  
Wherever I go

Still, I'm tryin' to remember I'm better off lyin'  
Still, I'm hoping I'll make it leave just by believin' it  
Will, it's here in this room until I finally catch my breath  
It's hard not to think it won't come around again

'Cause I know the night follows  
Me wherever I go  
I can feel the shadows  
Follow me close, wherever, I go  
I know the night follows  
Me wherever I go  
Look to the stars and hope  
They're watchin' me close  
Wherever I go

And I think I can take  
The way the night behaves  
It might be here to stay  
But it won't keep me awake  
And I think I can take  
The way the night behaves  
It might be here to stay  
But it won't keep me awake

Even though the night follows  
Me wherever I go  
I can feel the shadows  
Follow me close, wherever, I go  
I know the night follows  
Me wherever I go  
Look to the stars and hope  
They're watchin' me close  
Wherever I go

And I think I can take  
The way the night behaves  
It might be here to stay  
But it won't keep me awake  
And I think I can take  
The way the night behaves  
It might be here to stay  
But it won't keep me awake
