

Master Blaster

Anna Tsuchiya

Battle cry, this hunger
Got heaven under fire
Talks of war burning out sun
Now waiting for the thunder
Sky rising to darkness
Free falling into space

I'm ready take me into the light
(I'm scared)
All alone with detraction
(Oblivion)
To the sound of a blast son
Souls crying out, for justice!

I'm gonna
Ride on to the place where all things await

Take a sip of light
Transform myself once again
With my hands and I, send my spirit to
The sky line
Can't stop me now
Can't stop me now
God speed

Master blaster
Master blaster

Can't stop me now
Can't stop me now
God speed

Don't turn to the sound of a life time
(So glorious)
It's the sound of a life time
To come out, and face us
I'm with you
(Right) by the night to the place
Where darkness beats light

One more sip of light
And transform myself once again
With my hands and I, send my spirit to
The sky line
Can't stop me now
Can't stop me now
God speed

Master blaster
Master blaster
