

Ease Your Pain

Anne Murray

If I could ease your pain, if I could lighten your load
If I could make it just a little bit better for you
If I could just help you find that secret place in your mind
Where the light of understanding love outshines the sun

You know that sweet moonshine is not just illegal whiskey
It can also be the light that guides you
Through the shadows of fear when the devil is near
And you need some kind of helpin' hand to carry you through

I know you've been livin' in a downhill raid
You're seein' your death on a military plane
You better hold now, you can't take no more now
No doubt about it when you find out about it
You're gonna wanna run and tell all your friends about it
Easy, it's so easy

If I could ease your pain, if I could lighten your load
If I could make it just a little bit better for you
If I could just help you find that secret place in your mind
Where the light of understanding love outshines the sun

I know you've been livin' in a downhill raid
You're seein' your death on a military plane
You better hold now, you can't take no more now
No doubt about it when you find out about it
You're gonna wanna run and tell all your friends about it
Easy, it's so easy

If I could ease your pain, if I could lighten your load
If I could make it just a little bit better for you
If I could just help you find that secret place in your mind
Where the light of understanding love
Light of understanding love outshines the sun

Ease your pain, if I could lighten your load
If I could make it just a little bit better for you
If I could just help you find that secret place in your mind
Where the light of understanding love outshines the sun

If I could ease your pain, if I could lighten your load
If I could make it just a little bit better for you
If I could just help you find that secret place in your mind
Where the light of understanding love outshines the sun
