Annihilator

Catch a shooting star, burn it to a crisp Born into death, will you take the risk See buckets and buckets, yeah buckets of sin You'll never end and can never begin

```
Welcome to your death Welcome to your death Welcome to your death
```

No forest of pleasure or fields of pain High-rise at night see the pavement of stain A beckoning hand from those who were slain Now you can sleep again

```
Welcome to your death
Welcome to your death
Welcome to your death
```

I take the night and I stretch it wide
And I see all, you hide, I died
So slip right in, sip the wine
The caution flashes but the water's fine

```
Welcome to your death
Welcome to your death
Welcome to your death
```
