

# Ultraviolet

Annisokay

You're floating through space  
Like stars in a race  
You never come down  
Whatever they say  
We won't be descending  
As long as we stay  
We're in this together  
Dictating our Pace

They try to break you  
They try to break us  
Say we could bend  
But we will never fit in  
Don't let 'em get through  
Under your skin  
Cause you're shining bright from within

You even out my gravity

You're invisible to the rest  
But I see you in ultraviolet  
When your lightwaves travel through my chest  
I see you glow in ultraviolet  
I see you glow  
I see you glow in ultraviolet

Like a kaleidoscope  
Colors hard to define  
We paint our own hope  
In shades that intertwine  
Their black and white scheme  
Fails to undermine  
Our vibrant life that gleams  
Beyond their limiting signs

They try to break you  
They try to break us  
Say we could bend  
But we will never fit in  
Don't let 'em get through  
Under your skin  
Cause you're shining bright from within

You're invisible to the rest  
But I see you in ultraviolet  
When your lightwaves travel through my chest  
I see you glow in ultraviolet  
I see you glow  
I see you glow in ultraviolet

We won't shed our soul  
Defy their control  
Beneath our scars  
We are whole  
I can see you  
I can feel you  
You are half alive

But levitate on the inside

They don't feel  
They don't think  
They don't see  
The way we do

You're invisible to the rest  
But I see you in ultraviolet  
When your lightwaves travel through my chest  
I see you glow in ultraviolet  
I see you glow  
I see you glow in ultraviolet
