

Better Together

Anthem Lights

Something's got me hooked on you
Hypnotized with every move
Your eyes shine and you
Light me like a spark on fire
When you're gone the colors fade
The sun in my sky turns to gray
You're the flame that sets my beating heart on fire

Hey you
You know it's true
We're better together
Better together
Better together
Gonna love you all my life
You know we can never find another
We go so good with each other
We're better together
Better together
Better together
Gonna love you all my life

You're the reason for this smile
With every touch you drive me wild
As long as I have you
Then I've got all I need
When you're here life's beautiful
There's nothing wrong
Inside my world
You're the air I love to breathe
You're all I need

(Better together, better together)
(Better together, better together)

Hey you
You know it's true
We're better together
Better together
Better together
Gonna love you all my life
You know we can never find another
We go so good with each other
We're better together
Better together
Better together
Gonna love you all my life

(Better together, better together)
(Better together, better together)

Every time you go away
It's like I'm gonna go crazy
I don't ever wanna let you go

Hey you
You know it's true
We're better together

Better together

Hey you
You know it's true
We're better together
Better together
Better together
Gonna love you all my life

You know we can never find another
We go so good with each other
We're better together
Better together
Better together
Gonna love you all my life

(Better together, better together)
(Better together, better together)
