

Turn Around

Anthem Lights

Two wrongs never made a right
Some roads never find the light
If it's broken, you should fix it
There's no sense in wasting time
Everybody makes mistakes
Nobody's too far away
Love will leave the ninety nine
For the one who got away
For every wandering soul

The night is darkest just before the dawn
Sometimes you need to stop and go back
Just to carry on
There's no need to feel defeated
So don't let it get you down
Sometimes the only way to get home
Is to turn around

So if you're frozen in the cold
And you got nowhere to go
You're unsure, and it's unclear
How you got here on this road
There's no need to be afraid
Help is just one breath away
So swallow your pride
Put fear aside
And call out Jesus' name

The night is darkest just before the dawn
Sometimes you need to stop and go back
Just to carry on
There's no need to feel defeated
So don't let it get you down
Sometimes the only way to get home
Is to turn around

Turn around

The night is darkest just before the dawn
Sometimes you need to stop and go back
Just to carry on

The night is darkest just before the dawn
Sometimes you need to stop and go back
Just to carry on
There's no need to feel defeated
So don't let it get you down
Sometimes the only way to get home

Sometimes the only way to get home
Is to turn around
