I Wanna Dance with Somebody/How Will I Know

Anthony Callea

Clock strikes upon the hour
And the sun begins to fade
Still enough time to figure out
How to chase my blues away
I've done alright up 'til now
Light of day that shows me how
When the night falls
My loneliness calls

I wanna dance with somebody
I wanna feel the heat with somebody
Oh, I wanna dance with somebody
With somebody who loves me
Oh, I wanna dance with somebody
I wanna feel the heat with somebody
I wanna dance with somebody
With somebody who loves me

I've been in love and lost to my senses
Spinning through the town
Sooner or later, fever ends
And I wind up feeling down
I need a man who'll take a chance
On a love that burns hot enough to last
So when the night falls
My lonely heart calls

Oh, I wanna dance with somebody
I wanna feel the heat with somebody
Yeah, I wanna dance with somebody
With somebody who loves me
Oh, I wanna dance with somebody
I wanna feel the heat
Yeah, I wanna dance with somebody
With some

Oh, It's you, I know
You're the one I dream of
Looks into my eyes, takes me to the clouds above
Ooh, I lose control, can't seem to get enough
When I wake from dreaming, tell me, is it really love?

How will I know?
How will I know?
How will I know?
How will I know?

How will I know if he really loves me?
I say a prayer with every heartbeat
I fall in love whenever we meet
I'm asking you what you know about these things
How will I know if your'e thinking of me?
I try to phone, but I'm too shy can't speak
Falling in love it's all bittersweet
This love is strong, why do I feel weak?

How will I know? (Don't trust your feelings)

```
How will I know?
How will I know? (Love can be deceiving)
How will I know?

(How will I know?)
I say a prayer with every heartbeat
I fall in love whenever we meet
I'm asking you what you know about these things
How will I know if your'e thinking of me?
I try to phone, but I'm too shy can't speak
Falling in love it's all bittersweet
This love is strong, why do I feel weak?

When the night falls
My lonley heart calls
```
