Part Of My Life

Anthony David

Oh, it's easy to find someone to play with
And almost anyone will do to fill your idle time
But that really special someone you can
Share all your dreams with, is so hard to find, oh yeah

And it used to be like me to settle for the physical
But these days, it ain't too easy to make up my mind
'Cause apparently the body's just too temporary
To take up my precious time, oh

I've gotta know that
That I can be free with you
And you've gotta show that
That you're worthy of my time
You can stimulate my mind

I know that it looks good
But can you be a part of my life
I'm sure that it feels good
But can you be a part of my life

And it probably tastes good
But can you be a part of my life
I've got to know

I still appreciate the beauty of a woman
But there's more to what I need now than what meets the eye
And if beauty's only skin deep
Then your pretty skin won't send me to the highest high

Oh, it's been a long time, come in for maturity
And I believe that it's truly what it has to be
'Cause as much as I admire you
My sexual desire ain't controlling me, oh

See, I've gotta know that
That I can be free with you
And you've gotta show that
That you're worthy of my time
You can stimulate my mind

I know that it looks good
But can you be a part of my life
I'm sure that it feels good
But can you be a part of my life

And it probably tastes good
But can you be a part of my life
I've got to know one more time, hey hey

I know that it looks good
But can you be a part of my life
I'm sure that it feels good
But can you be a part of my life

And it probably tastes good
But can you be a part of my life

I've got to know, yeah yeah, yeah yeah

Can you be a part of my life?
I've got to know that
Can you be a part of my life?
I've got to know that

Can you be a part of my life?
I've got to know that
Can you be a part of my life?
I've got to know that

Can you be a part of my life?
(Can you be a part of my life?)
(I've got to know that)
Can you be a part of my life?
(Can you be a part of my life?)
(I've got to know that)
