

There is power in my weakness
It's perfect and sufficient
Even when I lay in the bed I have created with mistakes

I know you're working it out for my good
I know you're working it out for my good

All of my problems and all of my pain
You've woven with purpose that I can't explain
All of the heartache won't go to waste
I'll stand on your promise and I will say

You are working it out for my good, good, my good
You are working it out for my good, my good, my good
You are working it out for my good
My good...
My good...

In every circumstance
I'll stand in confidence
You won't go back on what you've spoken
If you said it, it's the truth

I know you're working it out for my good
I know you're working it out for my good

All of my problems, all of my pain
You've woven with purpose that I can't explain
All of the heartache won't go to waste
I'll stand on your promise and I will say

You are working it out for my good, good, good
You are working it out for my good, my good

You are working it out for my good, good
You are working it out for my good

Exceedingly
Abundantly
More than we can
Ask or think
I believe
You know what I you need
And my heart receives it

Exceedingly
Abundantly
More than we
Ask or think
I believe
You know what I you need
And my heart receives it

You can do
Exceedingly
You can do
Abundantly

You will do
More than we
Ask or think
I believe
You know what I you need

You are working it out for my good, good
You are working it out for my good, good
You are working it out for my good, good
You are working it out for my good, good
You are working it out for my good
