

# All Night

Anthony Russo

Lying in your room  
Feels just like a movie  
With the spotlight from the moon  
I don't wanna move  
So much left to wonder, let's uncover me and you

So can we touch just a little bit  
Taste a little bit more  
Your skin like cinnamon  
Come on baby, I'm already  
Lost in the thick of it  
Just think  
The places we could go  
If we just stop

I was hoping we could take all night  
Baby come and put your lips on mine  
Trace your body till we hit sunlight  
If it takes all night  
Let it take all night

Daylight it's fading early nowadays but  
I like a long night's lying  
In bed just wearing your t-shirt with my  
Hair a mess kissing you

So can we touch just a little bit  
Taste a little bit more  
Your skin like cinnamon  
Come on baby, I'm already  
Lost in the thick of it  
Just think  
The places we could go  
If we just stop

I was hoping we could take all night  
Baby come and put your lips on mine  
Trace your body till we hit sunlight  
If it takes all night  
Let it take all night

Put your hands on my chest  
We forget the world exists  
You put your hands on my neck  
Kiss me till there's nothing left  
You put your hands on my chest  
We forget the world exists  
Now I am right here with you

I was hoping we could take all night  
Baby come and put your lips on mine  
Trace your body till we hit sunlight  
If it takes all night  
Let it take all night

Put your hands on my chest  
We forget the world exists

You put your hands on my neck  
Kiss me till there's nothing left  
You put your hands on my chest  
We forget the world exists  
Now I am right here with you
