

## Come Alive

Anthony Russo

I close my eyes and tell my body that I'm sleeping  
But I'm wide awake and dreaming through these walls  
I left the keys inside the car to make it easy  
'Cause I don't want to waste a second when she calls

And when she calls

I come alive rushing over under the lights  
Take my hand up there we can fly  
There's a world upstairs we should find until we're outside  
And she said I might just be shiny and new  
And she said it might just be a quarter to two  
And she said I might just need more than a few  
Whatever you call what we do

Baby, so pathetic  
All I think about is when I'll see you naked  
It's never too late or too aggressive, yeah  
I'll make it there even if I had to crawl

'Cause when she calls

I come alive rushing over under the lights  
Take my hand up there we can fly  
There's a world upstairs we should find until we're outside  
And she said I might just be shiny and new  
And she said it might just be a quarter to two  
And she said I might just need more than a few  
Whatever you call what we do
