

Keep It Simple

Anthony Russo

Aye, aye

Lost in a daze
You're a serotonin tidal wave
All that I need
Is the presence of your energy

I just wanna
Cruise all night in my whip
You and I, two sliding
If I could pull up on you, will you pop outside?
Don't take forever baby, I just wanna
Show you how life can be
When it's not complicated
Lay one hand up on the wheel, one on your thigh
Let's keep it simple baby, I just wanna

Break you off
I get ahead of myself sometimes
But you're just so fine
I need it all the time
See the curves in your waist in the silhouette
Yeah, she got it but don't flex it on the internet
She don't want attention, nah

Just moved downtown, new apartment
Got a brand new job and a car lease
Got a brother in and out of the army
Want a brand new start, brand new start
Let me come by when you off work
I can show you all the things I can offer
Oh, I

I just wanna
Cruise all night in my whip
You and I, two sliding
If I could pull up on you, will you pop outside?
Don't take forever baby, I just wanna
Show you how life can be
When it's not complicated
Lay one hand up on the wheel, one on your thigh
Let's keep it simple baby
