

Set Yourself on Fire

Anti-Flag

Trying to understand what's with you
And all your friends and friend's friends are trying too
It's hard to find the words I really wanna say
But there's no point in waiting for another day

Crashing at the beach till season's end
Our unknown future was just waiting straight ahead
Yeah on the verge of something we'll never forget
In this the summer of our utter discontent

All caught up in the things that you want to do
You're all caught up in the things that are only... YOU!!!

You're gonna set yourself on fire
I see you set yourself on fire
Now you're burnin' down, burnin' down

Those days reckless, earnest, angry and naive
So much has changed but so much stays the same
Yeah self destruction is still flowin' in my veins
Could rise to greatness or could all go down in flames

All caught up in the things that you wanna do
In the things that are only... YOU!!!
They're only you!!! Yeah!!!

You're gonna set yourself on fire
I see you set yourself on fire
Now you're burnin' down, burning down

What are we, what are we gonna to do now
What are we, what are we gonna to do
What are we, what are we gonna to do now
What are we, what are we gonna to do now
What are we, what are we gonna to do
What are we, what are we gonna to do now

You're gonna set yourself on fire
I see you set yourself on fire
Now you're burnin' down, burnin' down

You gonna burn, you gonna burn
Gonna burn, gonna burn
