

# Throw It Away

Anti-Flag

You're going through the motions  
Destroying our emotion  
And praying on devotion  
It's just a game

There's something in the water  
Sold your sons and sold your daughters  
The voices getting stronger  
It's just a game

You've been handed everything just to throw it away  
You've been passing off the blame just to spit in our face  
A portrait of a version of the worst of our days  
You've been handed everything just to throw it away  
It's just a game

The cracks in the foundation  
And the fall of your nation  
Nero's song an apparition  
It's just a game

You've been handed everything just to throw it away  
You've been passing off the blame just to spit in our face  
A portrait of a version of the worst of our days  
You've been handed everything just to throw it away  
It's just a game

When your bloodline is a product  
And your privilege is a construct  
You've been handed everything  
Just to throw it away, just to throw it away  
In their failure we are made strong  
Rebuilding what has been undone  
You've been handed everything  
Just to throw it away, just to throw it away

You're going through the motions  
Destroying our emotion

You've been handed everything just to throw it away  
You've been passing off the blame just to spit in our face  
A portrait of a version of the worst of our days  
You've been handed everything just to throw it away  
It's just a game  
It's just a game  
It's just a game  
It's just a game

You're going through the motions  
Destroying our emotion
