Breaking the Machine

Antimatter

I'm breaking the machine
Tearing it apart
I started at the heart
Pulling at the elements
Killing the machine
Stripping out the parts
To liquidate won't take too long

So call the engineers
The code is obsolete

I'm circling the drain
Banging at the door
So what's this program for?
It won't load
Download
These loins were sated long ago

It's too late to say hello
And in my heart and soul I feel it's over
But don't blame us
It's a song we can but sing
And if you stay too long
Then you'll never get out

Breaking the machine
To rejoin
The system is on freeze
Fading out the screen
To white noise
To shadow

Breaking the machine
To rejoin
The system is on freeze
Fading out the screen
To white noise
To shadow
