

High on Love

Anuheia

Nothing ever brings you down
Nothing ever brings you down

Hey there boy, I took a dose of you
A little drop on my tongue makes me
Feel like I gotta get close to you
Sure we can go a little further if you like now
Another hit, another kiss, another puff in the clouds of your style

Nothing ever brings you down
We'll stay high up in our love forever
Nothing ever brings you down
You know we're in this ride together, oh
High on love (you got me high on love)
High on love

I don't need no doctor, man
And I don't need no rehab
Loving you is drinking in the daytime
Not supposed to but I'm happy 'cause I'm in the sunshine
Your love is an addiction, one hit and I was bitten
If loving you is wrong, guess I'm furthest from right
So let's get high on love tonight, yeah

What you're doing to my mind is heavenly
You can see it in my eyes
Take me back there to that one reality
Our love goes up and up and we will never come down

High on love
High on love
You call me up on the telephone
You call me up when I'm all alone
I need you more when you're far away
I need you more each and every day
You fit into my life so perfectly
Ain't nobody trying to tell on me
You got me high on love, high on love, yeah...
