

# Who Knew

Anuhea

Me and you  
We have some history  
It feels like we've been [?]  
For an eternity  
Multiple roles you played  
Various day to days  
Never could have predicted  
We'd go down in burning flames

Who knew, not me  
That this complicated melody  
Would ring true [?]  
And I'll take us on a jungle mystery

It's time to let you go  
Just a-roll with your life and let him flow  
It comes back and done to let you know  
If it was only that simple  
It's so much to put you through

Hey, hey, but who knew  
Who knew, who knew  
Hey, but who knew  
Who knew, who knew

Me and you  
We have some history  
Four years, one ring, future so clean  
And a life ever after happily  
Never joked that I would be like this  
But you fooled me like a bitter switch  
I fell in love with someone  
That you just aren't anymore

It's time to let you go  
Just a-roll with your life and let him flow  
It comes back and done to let you know  
If it was only that simple  
It's so much to put you through

Hey, hey, but who knew  
Who knew, who knew  
Hey, but who knew  
Who knew, who knew

And lovers beat on line  
But my heart's not mute  
So I sing this song  
Because I sing the truth  
About an island love  
With a world class view  
But was torn apart  
The hurricane came through  
Tryna get back up  
And gather all the pieces  
Tryna justify  
Unless there's all the reasons

But it had to end  
We really tried it's true  
I'm sick and sad to say  
That hey, hey, hoo, hoo

The party's over  
I said party's over

It's time to let you go  
Just a-roll with your life and let him flow  
It comes back and done to let you know  
If it was only that simple  
It's so much to put you through

Hey, hey, but who knew  
Who knew, who knew  
Hey, but who knew  
Who knew, who knew
