Neverbeen

ANYA

Pull me in and I will keep you close
We can move the mountains, we can move the mountains
We're miles apart but I wanna be nose to nose
We can cross the oceans, we can cross the oceans

I'd accept the space between us now
Between us now
We're more the same than we can dream of now
And I dream of how it could be

We've never been farther apart than this
So give in to me, open up your heart
We've never been farther apart than this
So have faith in me, open up your...

Your
Your heart
Your
Open up your...

I'll be up and I won't let you down
I'm right around the corner, right around the corner
I will follow you from town to town
Take me where you want now, take me where you want now

And I'd accept the space between us now
Between us now

We've never been farther apart than this
So give in to me, open up your heart
We've never been farther apart than this
So have faith in me, open up your...

Your
Your heart
Your
Open up your...

We've never been farther apart than this
So give in to me, open up your heart
We've never been farther apart than this
Have faith in me, open up your...

(Give in to me)
(Have faith in me, give in to me)
