

# Work

Apashe

They say that you can see the devil dance  
On Idle hands, so we put in work  
Amen

Put the city on my shoulder blades and molded waves  
Focused on devotion when it's roads to pave  
Kickin' in the doors and we opened gates  
For the years, blood, sweat, and tears that we overpaid!  
When it's no pain, it's no glory  
Legendary grind for the history  
Come to to shut us down, you and what army?  
We about to go live, make it loud for me  
Through rain, sleet, hail, or snowflakes  
Not a day off, when the payoff, was a rain drop in the lake  
I done been lost, took a big cost, never been off of my game  
Got a ape heart, I'mma go hard to the grave  
Now let's work

The grind don't stop  
We giving it a hundred till the squad on top  
We put in work  
The grind never dies  
We giving it a hundred till the whole team rise  
We put in work

Ah huh  
We put in work

(Switch)  
Work, work, work, work (Come on)  
Work, work, work, work

We put in work

Hey, hey, hey  
Hey, hey, hey

Ah huh  
We put in work

Hey, hey, hey

Work, work, work, work  
Work, work, work, work

Ain't no killing this energy  
Spill it from the spirit, them lyrics be hitting differently  
Like 100 rhinos are riding on my arrival, we rising to get the victory  
Turning dreams to memories  
What you know about making mud into solid gold?  
Hunger pains rumbling and still did it by the code  
Ten toes, standing in the fire, and we never fold  
I'mma come alive when it's on  
Now watch me work
