

When I look back on my life
Of walking a road with no signs
I couldn't believe what I couldn't see
But God only knows how I tried
A man on a mission, fear and ambition
Yeah the human condition
In my system, just a victim
Of passion and pride

Hindsight 20/20
So many blessings
You had for me
On the blindside
Was a story
How could I be
Finally seeing it now

It's like everything's coming into focus
All the hope that my heart never noticed
And my eyes were wide open the moment I found you
You were my breakthrough
I never knew there could be beauty in the broken
In the answers that I never would have chosen
Lost and confused
'Til there was You
Sky blue, clouds moved
You were my breakthrough

Carrying burdens, it wasn't working
Yeah, you can take them from here
I'm traveling lighter, future is brighter
I can see it so clear
Gave me new life when you let the light in
Only one I confide in
There's no undermining the mindset
Of love over fear

Hindsight 20/20
Always a path you laid before
I live out my story you get the glory
Cos I'm finally seeing it now

It's like everything's coming into focus
All the hope that my heart never noticed
And my eyes were wide open the moment I found you
You were my breakthrough
I never knew there could be beauty in the broken
In the answers that I never would have chosen
Lost and confused
'Til there was You
Sky blue, clouds moved
You were my breakthrough
You were my breakthrough

Hindsight 20/20
