

**NOW!**

**Apollo LTD**

Welcome to a moment that will never be repeated  
I know you know it, I'm just making sure you see it  
We're always tryna move ahead so fast  
Can't see the present 'til it flies right past

Overthinking's got a funny way of stealing  
All the colors that you really should be seeing  
I know it doesn't always feel that way  
But look around, you'll see it's all OK

Right now  
Right now

(We gotta let it all play out)

Somebody told me  
Take it slowly  
Even if the sun goes down  
The stars come out  
We live in the now

Why the worry?  
Such a hurry  
I know in the end somehow  
It all works out  
So live in the now

Right now

Welcome to a moment that took all your life to happen  
You see it start to slip away until you grab it  
I did the math, you only get one chance  
Don't wanna miss it while I'm making my plans

A roller-coaster ride but nothing's accidental  
I've seen the rise and fall and call it providential  
Ain't gonna argue with the give and take  
All I want it to be wide-awake

Somebody told me  
Take it slowly  
Even if the sun goes down  
The stars come out  
We live in the now

Why the worry?  
Such a hurry  
I know in the end somehow  
It all works out  
So live in the now

Right now

Life is moving along so fast  
Look ahead and you'll see right past it  
Set your mind right and make it last  
Life is moving ahead so fast

Right now  
So fast  
So fast  
Right now  
So fast  
Life is moving ahead so fast  
Right now  
I don't know anymore
