

Run

Apollo LTD

The future's bright
The time is now
Destiny is callin'
Can you hear the sound
You're brave enough
To chase the sun
Show 'em what we're made of
We were born to run

There's a spark in your heart
And a fire that's in your eyes
Full of hope 'cause ya know everything's gonna be alright
Livin' our best life, takin' it all in stride
And the light will be our guide
We were born to run
We were born to run
Run
We were born to run
We were born to run
Run

Staring down
The road ahead
Step into the wild
Hold the world inside your hand
Gonna take a chance
While we're still young
Nothings gonna slow us down
Cause we were born to run

There's a spark in your heart
And a fire that's in your eyes
Full of hope 'cause ya know everything's gonna be alright
Livin' our best life, takin' it all in stride
And the light will be our guide
We were born to run
There's a spark in your heart
And a fire that's in your eyes
Full of hope 'cause ya know everything's gonna be alright
Livin' our best life, takin' it all in stride
And the light will be our guide
We were born to run

We were born to run
We were born to run
We were born to run

It's written in sky
These dreams gonna come to life
The lights are shining bright
We were born to run

There's a spark in your heart
And a fire that's in your eyes
Full of hope 'cause ya know everything's gonna be alright
Livin' our best life, takin' it all in stride
And the light will be our guide

We were born to run

We were born to run

We were born to run

We were born to run
