

Goodbye

Apparat

(please put me to bed
and turn down the light)

fold down your hands
give me a sigh
put down your lies

lay down next to me
don't listen when I scream
bury your doubts and fall asleep

find out I was just a bad dream

let the bed sheet soak up my tears
and watch the only way out disappear
don't tell me why
kiss me goodbye

for neither ever nor never
goodbye
neither ever nor never
goodbye
