

Ghost

Aquilo

Give up the ghost because you know what you've opened
Like a caterpillar you're gonna change for good
Just give me the best 'cause you know that it's over
'Cause I don't quite know how I'm gonna win
Just a kick in the teeth and you know that you're frozen
And just like that you pack your bags and run
And if I ever see you when you're in a moment
I'm not sure if I'd know what to do

'Cause you're always keeping me guessing
It's not like you're evil
Something comes along and breaks apart

You can have it all if you carry on
It's the sunny side of moving on

Such a perfect way to move along
It's the sunny side of what went wrong

Are you making the most of a bad situation?
'Cause we've been living in the house you built for one
And if I give you a reason for you to come closer
Well just like that you pack your bags and run

'Cause you're always keeping me guessing
It's not like you're evil
Something comes along and breaks apar

You can have it all if you carry on
It's the sunny side of moving on
Such a perfect way to move along
It's the sunny side of what went wrong
