

Keep Moving

Aquilo

Ooh, there's a beauty in the pain
An ocean full of rain
I got cold, so I closed an open door
Now I don't know what for

If we keep moving
Long enough to know where we went wrong
Keep moving

You and I, two stars colliding
Underneath the sound of lightning
So loud, we don't say goodbye
Miles away from where we started
Something close to broken hearted
Somehow, we're gonna get out alive

If we keep moving
Long enough to know where we went wrong
Keep moving
Long enough to say we're holding on

You can run away from
You can run away from
You can run away from it all
You can run away from
You can run away from
You can run away from it all

If we keep moving
Long enough to know where we went wrong
We can keep moving
Long enough to say we're holding on
