

# Painkiller

Aquilo

How long's too long  
To wait for someone?  
Say what you want about it  
If it helps you, it's supposed to

Go out, get drunk  
Go out, feel numb  
Stay out all night if you need to  
Sometimes we all do

I think you need a painkiller  
'Cause you've been sleeping with the lights on  
Take away the pain quicker  
And all that shit you're tryna run from  
'Cause I don't really know about you  
I hate to see you black and blue  
I could be your painkiller

Head up, stay strong  
Your curtains still drawn  
And do what you need to be human  
You do you man

I think you need a painkiller  
'Cause you've been sleeping with the lights on  
Take away the pain quicker  
And all that shit you're tryna run from  
'Cause I don't really know about you  
I hate to see you black and blue  
I could be your painkiller

Time will slowly unfold you  
Even though they told you nothing would work  
You've been in the deep end  
Without your best friend  
Man, I know it hurts

I think you need a painkiller  
'Cause you've been sleeping with the lights on  
Take away the pain quicker  
And all that shit you're tryna run from  
'Cause I don't really know about you  
I hate to see you black and blue  
I could be your painkiller
