

# Even When

Aranda

Even when I break down  
And I can't find a way out  
When the sun in the sky begins to bleed  
Like the fire in me

Alone for now again  
Left only with my thoughts  
And all the countless friends  
Nowhere to be found now

The world keeps on spinning  
Into the unknown

Even when I break down  
And I can't find a way out  
When the sun in the sky begins to bleed  
Like the fire in me  
Even when I break down  
I'll try and find my way out  
No I won't lose the fight inside of me  
That wants to believe  
You're there even when

I finally lost my way  
And all my second chances  
I can't blame yesterday  
And tomorrow's not written

The world keeps on spinning  
Into the unknown

Even when I break down  
And I can't find a way out  
When the sun in the sky begins to bleed  
Like the fire in me  
Even when I break down  
I'll try and find my way out  
No I won't lose the fight inside of me  
That wants to believe  
You're there even when

Round and round and round we go  
The sound the sound of coming home  
Round and round and round we go  
This is the sound of coming home

Even when I break down  
And I can't find a way out  
When the sun in the sky begins to bleed  
Like the fire in me  
Even when I break down  
I'll try and find my way out  
No I won't lose the fight inside of me  
That wants to believe  
You're there even when  
You're there even when  
You're there even when
