

# Gravity

Aranda

I see right through you  
With your 'how've you been's and 'it's nice to see you again's  
Pretending everything is okay  
You stole my heart and now I got it back  
How could you leave me like that  
Wouldn't that be nice  
If I just let you back in my life

You got it all worked out just a little too late,  
you took the long way down when you pushed me away,  
you're gonna say we all need a little gravity,  
give me just a little gravity,  
we all need a little gravity,  
give me just a little gravity

One of these days you're gonna lose your game  
Gonna run out of blame  
When the jokes you've made turn on you  
Well you sold me out  
And you question my word  
And now you falling to earth and just in time  
Don't forget to enjoy the ride

Situation critical  
Take it in and let go  
Game over this time  
Destination goodbye  
Your pedestal was too high  
And baby this well has run dry  
Your well has run dry
