The past that led to today is connected by an endless road  
People in times and places that you don't know have been gently supporting you

Where will this road go? even if you ask the wind  
There's no answer there

Our dreams were connected by many different paths  
Someday they'll let off the light of hope  
We can hear noise far in the distance  
Feeling it, we'll walk to the future we're walking on the road  
"We're being connected together"  
On the same road

Me being alive now will connect to someone else's wish  
I reflect on the coincidence that we met and what it means now

I've always been hearing a gentle lullaby  
Words of life that won't ever vanish

The eras change and time passes  
Even if we chase after a different tomorrow  
We'll surely come back to this road again someday  
We're always as one we're walking on the road  
"We're being connected together"  
On the wind

Our dreams were connected by many different paths  
Someday they'll let off the light of hope  
We can hear noise far in the distance  
Feeling it, we'll walk to the future we're walking on the road

The eras change and time passes  
Even if we chase after a different tomorrow  
We'll surely come back to this road again someday  
We're always as one we're walking on the road  
"We're being connected together"  
On the same road...
