La la la...

You & I believed in love you & I believed it all
You & I looked at rain eyes like a firefly

Saying good bye in the rain that wet the street we just stood still, lost fo
r words
Your eyes shone like fireflies they were so sad that I couldn't move and onl
y gazed at them

We hurt each other
I wondered how I could heal you

Weepin' in the rain that's right, the rain seems like fireflies making our l
ove fall down in the shape of tears
I just want your love I let go of your hand I loved you from the bottom of m
y heart
I won't forget even if I cry this night

Gazing at the lights that are flying away
We leaned on each other, supporting one another
We burned that day into us our fingers were overlapping
Rain, firefly, lady
Firefly, baby

We had many gentle days here in this room where every corner holds your laug
hter and your sleeping face
The two of us weren't able to make our happiness come true

Weepin' in the rain that's right, the rain seems like fireflies making our l
ove fall down in the shape of tears

I just want your love I let go of your hand I loved you from the bottom of my heart

I won't forget even if I cry this night

Now, the distance between us has grown very far

Sometimes I strangely want you so much

And now, in my mind there still lingers an uneasiness

Rain, firefly, lady

Firefly, baby

Because there are so many memories here, I can't move forward

Even though the signal is changing colors now

Weepin' in the rain that's right, the rain seems like fireflies making our love fall down in the shape of tears

I just want your love I let go of your hand I loved you from the bottom of my heart

I won't forget
