I'm gonna say let me down
I'm gonna say let me down
I'm gonna say let me down

I'm gonna say let me down
I'm gonna say let me down

I'm gonna say let me down
I'm gonna say let me down

Behind your words, you always say cheap things to criticize
But anyway, I'm in the middle of a change of heart everyday I'm searching for something to rely on
I'm too naive... everyday makes fun of me with a flavor of secrecy on the eternally continuing tracks
My ideal seems like it will become a wonder beyond my wildest dreams

Baby, you always seem like a broken lady tell you all night long
A level of sin trippin' on me lady love you all day
What you see? is this a dream?

The end is coming any time now in your and only your world
Let me down and then "let me down" will come
Just that is enough
Baby, you're ambiguous and a mess my and only my paradise
Ah...

Don't let me down girl!

I want to see everything with you forever in your and only your world
Let me down and then "let me down" will come
Just that is enough
Whatever the situation, that is always my and only my fault
Ah...

You became as free, willful, and selfish as you liked always troubled becaus

e of that

Even though my ideal had become a wonder beyond my wildest dreams

Baby, you always seem like a broken lady tell you all night long
A level of sin trippin' on me lady love you all day
What you see? is this a dream?

Who are you with and what are you doing now? will these impertinent delusion
s fade away?

Tell me with your name and your voice

Just that is enough

Always passing by each other at intersections I fell in love with your eyes
Ah...

Dreams and reality go back and forth
I want to hear that sweet voice
Crawling on the ground, every day has no meaning
If it's just this time
Then you are the commander babe

Like this, all night long ha ha
It's delusions again
Absentminded because of it
Don't let me down girl

I'm gonna say let me down
I'm gonna say let me down

I'm gonna say let me down
I'm gonna say let me down

The end is coming any time now in your and only your world
Let me down and then "let me down" will come
Just that is enough
Baby, you're ambiguous and a mess my and only my paradise
Ah...

Don't let me down girl!

Who are you with and what are you doing now? will these impertinent delusion
s fade away?

Tell me with your name and your voice
Just that is enough
Always passing by each other at intersections I fell in love with your eyes
Ah...

I'm gonna say let me down
I'm gonna say let me down
I'm gonna say let me down

I'm gonna say let me down
I'm gonna say let me down
