The memories that were carved haven't faded yet  
Just giving yourself up to these days that are rolling by  
This beating heart is searching for something it's still shaking even now

Even if what you see on the other side of the sky is an endless plain  
We don't need the words that are always here  
Every day, every night, every time, always that's right  
With unshakable feelings

Our voices from those days are calling  
To the top, tomorrow starts moving  
You can hear it too, right? we don't need a reason  
Surely, there isn't only one answer  
There's a place we'll get to someday

If there's something I'm proud of so that it'll get to you  
I'll go to a world I haven't seen yet

A to the R S is the place to be yes, yes  
Y'all in the place to be going to the top stay with me  
If I'm with you, I can keep going, and keep it going on (and on)  
"The voices of hope"  
It's hard, it's dark tonight to the sky

Even when you don't know which way you should go  
I just believed in my heart and look only forward  
If you can imagine it, no matter how far away the wall is, you can cross over it

Since those days, we were searching for something we couldn't see  
We, who are always here, are everything to us  
Every day, every night, every time, always that's right  
With feelings that won't ever die out

Our voices from those days are calling  
To the top, the future starts moving  
You've realized it too, right? we don't need a reason  
In these hands is something that's definite  
There's a place we'll get to someday  
My hesitation will disappear, so start running  
I'll go to a world I haven't seen yet

To the top to the top to the top, come with me  
To the top to the top to the top, come with me  
To the top to the top to the top, come with me  
To the top to the top I promise you

Our voices from those days are calling  
To the top, tomorrow starts moving  
You can hear it too, right? we don't need a reason  
Surely, there isn't only one answer  
There's a place we'll get to someday  
If there's something I'm proud of so that it'll get to you  
I'll go to a world I haven't seen yet
