Only love surely love is something you don't have to doubt
Only love always, only you are my light

If you're going to say, "you were pretending to understand love" that's what
I had intended
Until now I'd never come across feelings that would make me lose my composur
e this much

Don't pretend to be so tough
You should stay as you are in your heart
We'll become one
Let's even share our tears

Only love the feeling of love gives us courage
Only love we gaze at each other never ever want the universe embraces us

Let's leave symbols of our love as we walk through this season
Inside the old photographs, there are many treasures of ours let's take more

Just because you are here
My hesitation, everything disappears
My heart becomes more gentle
It's the feeling of being happy together

Only love I've managed to meet an important love in this world
Only love if we look out over the future never ever want the two of us shoul
d be there

This is the first time so
That I've found something more important than even myself
I want to show you what's in my heart
It's full of you
Baby, come on, come on let's get it on
So baby, come on, come on yeah, I love you
In the morning, in the afternoon, in the evening, forever and ever and ever
lovin'

Only you in my heart, I vow only you that my feelings will last forever
Only you without ever looking away only you I'll only look at you

Only love the feeling of love gives us courage
Only love we gaze at each other never ever want the universe embraces us

Only love I've managed to meet an important love in this world
Only love if we look out over the future never ever want the two of us should be there
