I wanna feel your love blowing through me  
Where's that melody going to?  
I wanna feel your love I want to hold you close  
In my dreams but you were mine

I remember who the moment our eyes met  
It felt like I was floating sugar and salt  
At times, sweet so sweet then bitter it was so fleeting  
As if it had arranged it, from the sky fell an evening shower

(One day)  
Going to a restaurant again  
Going to the movies again  
Going on a drive again, I learn more about you  
And again, we've become somewhat similar to each other  
A plain canvas is being spread with color

Your left ear was leaning against my shoulder (yeah)  
Our connected hands shook with meaning (yeah)  
Since when had we both gotten stubborn  
One day at a time, the scenery keeps passing by

(Baby)  
Your hands were so much more slender than mine  
Your soft slender hands  
Ah, untangling our entwined fingers  
My mind is swimming in the memories

I wanna feel your love I'm frozen  
Who does warmth belong to?  
I wanna feel your love shedding tears wishing for it  
Remembering and then forgetting and you were mine

Love... love... lovin' you  
Always...  
I'll always go to see you  
Wondering what you are doing, I look up at the sky again  
Although, I get impatient when there's no answer from it  
There's my cowardice again  
A guy's cowardice is kind of embarrassing... but that's what it was  
Baby, I love...  
Are you getting this?  
Unable to break away, I'm still swimming in the memories even now

I wanna feel your love blowing through me  
Where's that melody going to?  
I wanna feel your love I want to hold you close  
In my dreams but you were mine

One more time call me, call me  
I can't say it just tell me, tell me why  
One last time call me, call me  
The words I'm repeating over and over are, "I wanna feel your love... you're  
the one for me"

I wanna feel your love I'm frozen  
Who does warmth belong to?  
I wanna feel your love shedding tears wishing for it  
Remembering and then forgetting and you were mine  
I'm praying for your future
