Crown of Love

Arcade Fire

```
            C               Fmaj7
1. They say it fades if you let it
      Gsus4           E7/As
   love was made to forget it
             C               Fmaj7
   I carved your name across my eyelids
            Gsus4           E7/As
   You pray for rain I pray for blindness

             Am                  F
R: If you still want me, please forgive me
             C               G
   The crown of love has fallen from me
             Am                  F
   If you still want me, please forgive me
            C            G
   Because the spark is not within me

            C             Fmaj7           C
   I snuffed it out before my mom walked in my bedroom

2. The only thing that you keep changin'
   Is your name, my love keeps growin'
   Still the same, just like a cancer
   And you won't give me a straight answer

R: If you still want me, please forgive me
             C               G      E7/As
   The crown of love has fallen from me
   If you still want me please forgive me
   Because your hands are not upon me.

   I shrugged them off before my mom walked in my bedroom

3. The pains of love, and they keep growin'
   In my heart there's flowers growin'
   On the grave of our old love
   Since you gave me a straight answer

             Am                  F
R: If you still want me, please forgive me
             C             G    E7/As
   The crown of love is not upon me
             Am                  F
   If you still want me, please forgive me
            C              C/As
   Cause this crown is not within me
           C/G               C/F
   It's not within me, it's not within me

                    C/G
*: You gotta be the one, you gotta be the way
               C/F
   Your name is the only word that I can say
               C/G
   You gotta be the one, you gotta be the way
                        C/F                        C/G  C/As
```

```
            Your name is the only word, the only word that I can say!
                              C/G  C/As
            The only word that I can say!

        C/G  C/As
```
